Information on IC7100BKT

Created with the Personal Edition of HelpNDoc: [Streamline Your CHM Help File Creation with HelpNDoc](#)

What it is

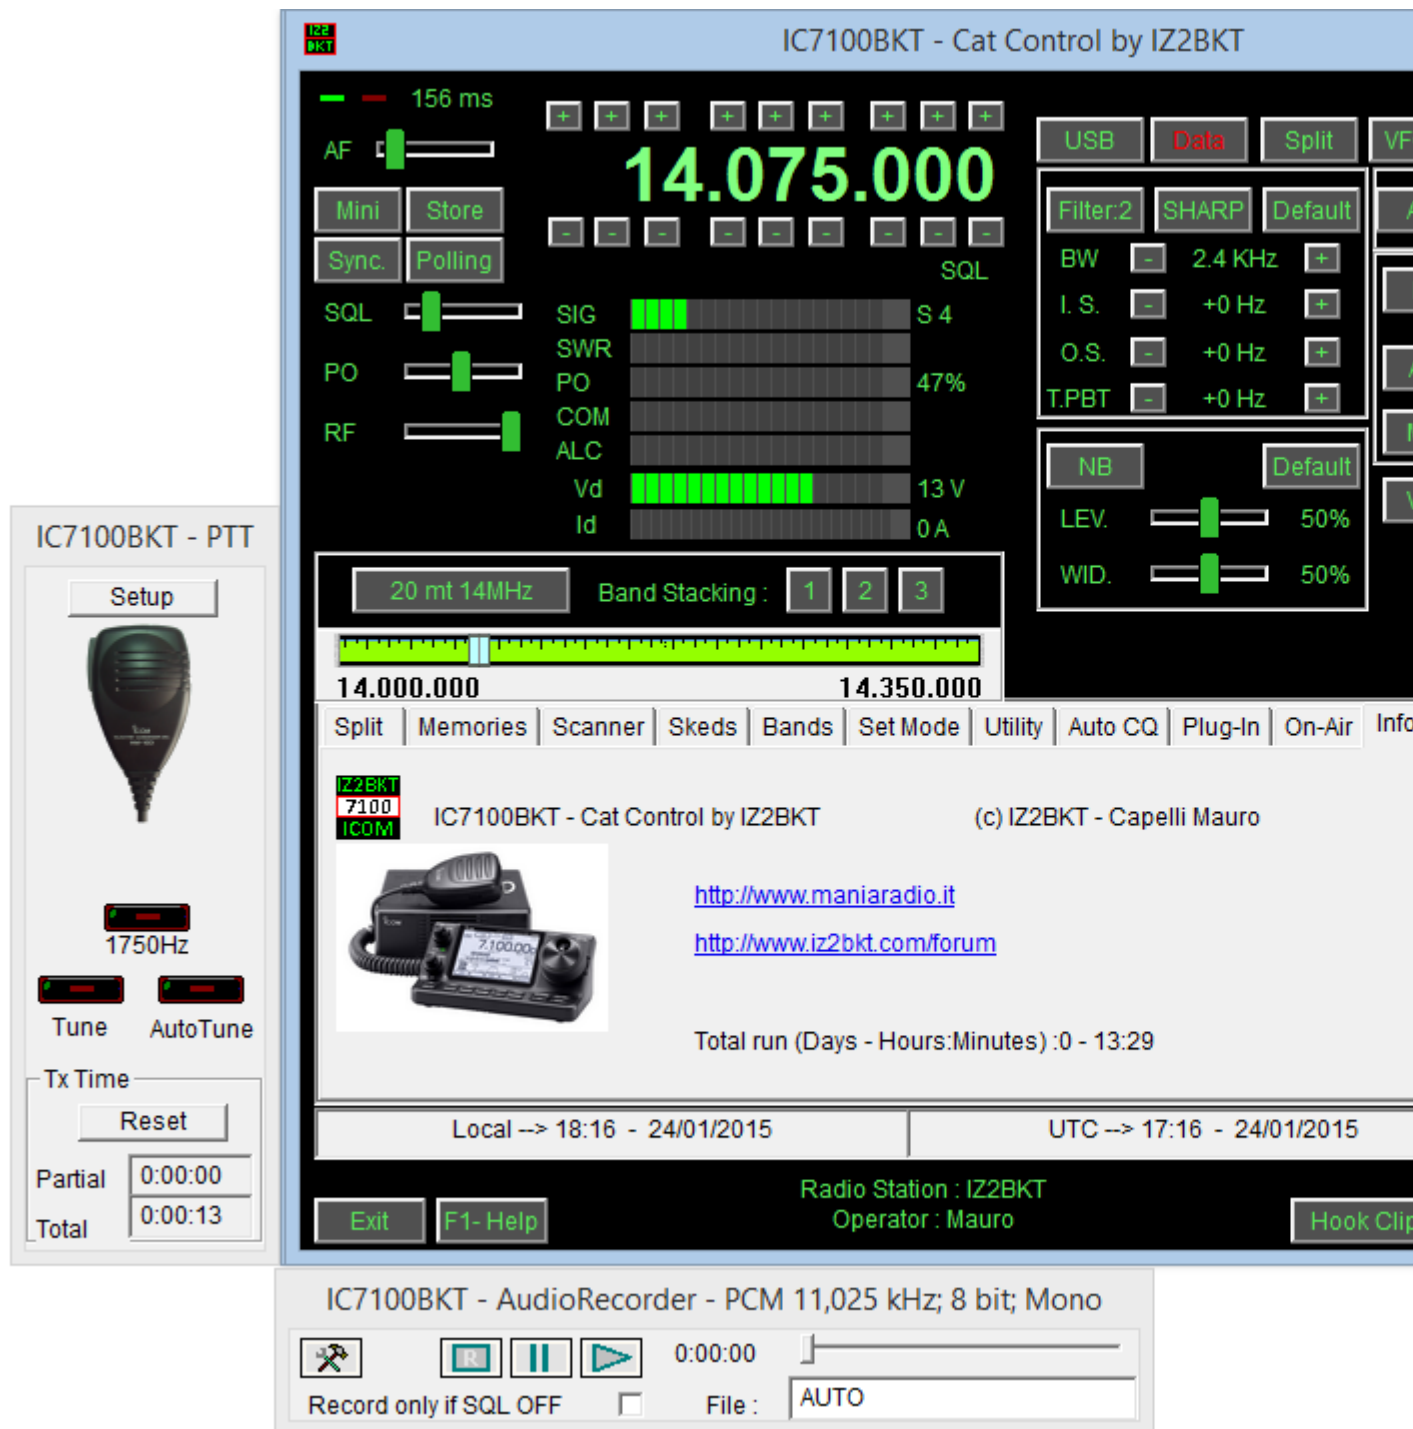

IC7100BKT

[Top](#) [Next](#)

What it is

[Top](#) [Next](#)

ATTENTION: this guide has been translated by an automatic system, excuse

The IC7100BKT CAT program controls the ICOM IC-7100 transceiver using a personal computer running Microsoft Windows XP, Vista, 7, 8, 8.1 32 and 64 bit.

The main window has the most commonly used commands.

When the cursor hovers over a button or slider a pop-up balloon will display a short description of its function.

Right clicking on a slider will allow a numerical value to be input for that setting

The LED's located at top left of the window blink at the data transfer rate between the program and the Txvtr.

Press F1 key to call this guide..

Versions

10/08/2014 Ver. 1.3.1

Correct setting remote data mode.

13/08/2014 Ver. 1.3.2

Include BktExtension71k ver. 1.17.0.

17/08/2014 Ver. 1.3.3

Fixed bug about displaying child windows (DV, PTT, Audio Recorder and Quick Set).

18/08/2014 Ver. 1.3.4

Improved Power On and Power Off function.

11/10/2014 Ver. 1.3.5

Automatic restart after configuration.

18/12/2014 Ver. 1.3.6

Improved copy/cut/paste of memories.

28/12/2014 Ver. 1.3.7

Correct trial version for 2015.

25/01/2015 Ver. 1.4.0

Added support for OnAir status on HrdLog and EnzoLog.

Improved loading of registration keys.

Changed the default font with Arial 9 points.

Improved the installation.

04/02/2015 Ver. 1.4.1

After a software tune is set correctly the Data mode.

09/05/2015 Ver. 1.5.0

Added CAT support for HrdLog.

19/07/2015 Ver. 1.5.1

Support BKTEExtension 1.18.0

19/08/2015 Ver. 1.6.0

Improved AutoCQ

In tab Set Mode, adding the manage input of the modulation

23/08/2015 Ver. 1.6.1

Correct label keys AutoCQ

02/09/2015 Ver. 1.7.0

Adding [Custom Key](#)

Correct import memories from CSV column "Selected"

Support BKTEExtension 1.19.0

10/09/2015 Ver. 1.7.1

Improved [Custom Key](#) windows

10/10/2015 Ver. 1.7.2

Support BktExtension 1.20.0

12/12/2015 Ver. 1.8.0

Added automatic call on CW in the function [AutoCQ](#)

03/01/2016 Ver. 1.8.1

Support BktExtension 1.21.0

27/02/2016 Ver. 1.8.2

View the version in use (Free, Full or Trial)

03/04/2016 Ver. 1.8.3

Correct filter settings when changing band

18/08/2016 Ver. 1.8.4

New version 1.0.1 of OnAir

Correct link to the forum

30/04/2017 Ver. 1.9.0

Added 1KHz note for software tuning

Added the option to send by enabling USB input during 1KHz software tuning or 1750Hz note output

23/07/2017 Ver. 1.10.0

Added preamplifier setting 1 and 2

10/09/2017 Ver. 1.10.5

Fixed bug on AutoUSB

Added flag "Keep on-front" on Custom Key

07/10/2017 Ver. 1.11.0

Support BktExtension 1.22.0 for BktDxCluster Android

21/08/2018 Ver. 1.11.1

Link update

21/05/2019 Ver. 1.11.2

Fixed the step in the Scanner function

26/05/2019 Ver. 1.11.3

Correct sort of grid in edit memories window

Added automatic power on of RTX in activation of a sked

22/09/2019 Ver. 1.11.4

Improved Filter management with Mode change

02/01/2021 Ver. 1.11.5

Improved audio device management

02/06/2023 Ver. 1.11.6

Correct key loading for the trial version

04/04/2024 Ver. 1.12.0

Various improvements

14/01/2025 Ver. 1.13.0

Added LAN protocol compatible with DX Commander by DXLabs (Replaces BktNetInterface)

Removed EnzoLog from On-Air as it is no longer active.

Several improvements

23/01/2025 Ver. 1.13.1

Improved LAN protocol

29/01/2025 Ver. 1.13.2

Improved LAN protocol compatibility

04/02/2025 Ver. 1.13.3

Correct command to go to TX from LAN protocol

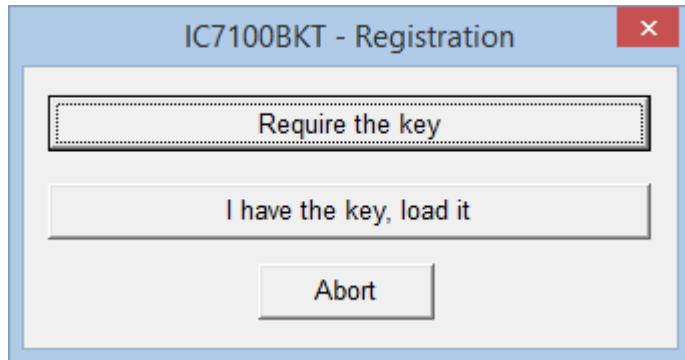

23/02/2025 Ver. 1.13.4

Improved LAN protocol for multiple commands

Program registration

Program registration

[Top](#) [Previous](#) [Next](#)

All the information on the registration are on: <https://www.maniaradio.it/en/ic7100registrazione.html>.

The activation key is sent via email as an attachment. Please note: the delivery system is automated and may be classified as SPAM by some providers or programs. Therefore, please configure your system to accept emails from the domains iz2bkt.com and maniaradio.it, and authorize attachments in ZIP format.

The activation key for the Free version is completely free and generated automatically upon first launch, allowing the use of many program functions. Furthermore, it allows you to try out the features of the Full version for 30 days.

To install the registration key:

Method 1:

Save the <call.IC7100BKT.bkt> key file to the program's installation folder.
Launch the IC7100BKT program.

Method 2:

Save the <call.IC7100BKT.bkt> file attached to the received email (replace "call" with your specified callsign in the registration form) in a folder.
Launch the IC7100BKT program.
When prompted for registration, click on the [Load Key] button.
Select the folder and the file saved in step 1 and click [Open].
Save the activation key to a floppy disk or removable device for backup.

Configuration

Configuration

[Top](#) [Previous](#) [Next](#)

General configuration of the program.

Is important that the values of communication of the serial port and the address CI-V that has to exactly correspond with the values CI-V BAUD and CI-V ADDRES in the IC7100. You advises to care the parameter CI-V BAUD of the transceiver as Auto.

[COM] Serial port and external drive setting.

[PTT] PTT and antenna tuner setting.

[Audio] Audio setting.

[Address CI-V] Exadecimal address of interface CI-V (default = 88).

[S-Meter Calibration] Set up the values [Limit down] and [Divisor] to make to correspond the value read by the S-Meter of the program with that of the RTX.

[Colors] Choose the colors for display and the keys.

[Communication with teh Clipboard] Parameters for a correct exchange of the data with the clusters programs

[UTC Offset] Points out the bewilderment in times among the time UTC and that local. If put to [Auto] for the calculation of the time UTC is used the settings of Windows.

[Log] Generally must be let empty, point out the name of a file in which to save the Log of exchange dates on the serial port.

[Use the memory E99 for the temporary data] If select this option the memory <99> of the bench <E> its used to support of some functions like the control of the state of the DUP and the SPLIT.

[Synchronize clock on startup] Enabling this option, the RTX clock is synchronized with one PC to the first change of minute from the start of the programme.

[Change Language] Select the language.

[Timing scan control (0 for Auto)] Time in milliseconds for scanner manage function, leave 0 for automatic control.

[Latency time (0 for Auto)] Work time in millisecondi, set to zero for the automatic calculation to the start. A too low latency time might cause the data loss between the pc and the rtx, a too high time slows down the reading of the data of the rtx.

[Enable ToolTips] Enable the help ballons

[Check for updates every] Range of days for automatic updates of the program. Set to 0 not to check.

[Enable LAN protocol on port:] Enable the TCP communication protocol on the specified LAN port. This feature includes DX Labs Suite Commander emulation and replaces the BktNetInterface plug-in.

[Font Main Window] Select the font to be used for the main window, [Size] to enlarge or shrink the main window size.

[Font Memory, PTT e Audio Recorder] Select the font to be used for the secondary window, [Size] to enlarge or shrink the secondary window size.

[Restore Default] Restore the default parameters of the program.

Configuration COM

Configuration

[Top](#) [Previous](#) [Next](#)

Configuration COM

[Top](#) [Previous](#) [Next](#)

These parameters are essential for a good operation of the program. If a transistor [interface](#) is used it is worthwhile to plan RTS and DTR to ON, with an [interface](#) with the MAX232 it is recommended to plan to 19200,N,8,1 with RTS and DTR to OFF. If you have other interfaces connected on the same serial ports (es. interfaces for PSK31), it needs RTS or DTR to OFF to avoid to send in transmission the RTX when he enters the program.

For optimal operation of the program select 9600 or 19200 baud.

Its possible to select an external driver (es. [BKTClient](#) for the remote management by TCP/IP), in such case will be activated the key [Driver Setup].

Selecting the driver **BktDummy** the program will work in dummy mode also without the RTX connected.

[Serial Port Mode]: for USB interfaces or for RIGtalk of West Mountain Radio use MODE 1.

If there are connection problems try this:

- Change the [Serial Port Mode]
- Change the RTS and/or DTR
- Down the connection speed from 19200 to 9600 BAUD or lower
- Try to use [BKTRS232](#) driver
- Look here : <http://www.iz2bkt.com/forum/viewtopic.php?f=26&t=328>

Configuration PTT
[Top](#) [Previous](#) [Next](#)

IC7100BKT - PTT Setup

Tune software emulation

Mode: RTTY Power: 20 % Seconds: 5

Use 1KHz tone ☒

Switch USB input while tuning or transmit 1750Hz ☒

Key for PTT: NONE ☐ Key PTT keep in front

Clipboard

PTT ON: @[on]@

PTT OFF: @[off]@

OK Cancel

Configuration of the management of the PTT, that is the possibility to send the RTX in transmission through the program.

[Tune software emulation] Put the RTX in transmission for the time and with power and mode specifies allowing to tune the antenna.

[Use 1KHz tone] Sends 1 KHz note to desired power for the time given to promote the tuning

[Switch USB input while tuning or transmit 1750Hz] When it starts transmitting enables USB input, at the end, rehabilitates the previous input

[Key PTT] Select the key of the keyboard to use like PTT, NONE in order not to use any.

[Key PTT keep in front] Put the window of the PTT always in front of all the other windows.

Clipboard

[PTT ON] Sequence of characters that, if copied in the clipboard of Windows, put the RTX in transmission.

[PTT OFF] Sequence of characters that, if copied in the clipboard of Windows, put the RTX in reception.

Audio configuration

Configuration

[Top](#) [Previous](#) [Next](#)

Audio configuration

[Top](#) [Previous](#) [Next](#)

[Enable audio support] **Enable/disable the audio support.**

Audio Input] Chose the audio device for input. Default for windows default device.

Audio Output] Chose the audio device for output. Default for windows default device.

Audio format] Choose the audio format to use for the recording. To record voice communications is preferred to install a CoDec MP3 and choose MP3. With the configuration in figure, an hour of recording occupies 3,7Mb of disc. To record digital communications them convenient is PCM, in this case the occupation on disc will be much high. The default audio file format is WAV.

Folder for audio files] Folder for saves the audio files. If the field is empty, it comes up the default folder where the program is installed.

- [Name of audio file] it is possible to specify a default name to use for the files audio, if he leaves AUTO, to the beginning of every recording, a file will be produced by the name BKTymmddhhmmss.WAV, where yy=year, mm=month, dd=day, hh=hour, mm=minute and ss=second of beginning recording.
- [Keep recorder in front] If activated, the Audio Recorder is always maintained in front of all the other windows.

ATTENTION: this guide has been translated by an automatic system, excuse

In the main window they are present the commands of great use, **stopping itself with the mouse on a key or a slider of the command, while, click with the mouse right key on the sliders or on numerical values to input the [value](#).**

The two Led green/red places up to right of the window blink to the passage of data between program and RTX.

As to change frequency:

- Click with the right mouse button on the frequency, enter the frequency in Hz and press the Enter key.
- Use the keys + and - dispose to the edges of the frequency display.
- Position the mouse on the frequency display and use the wheel of the mouse.
- Use the function keys F2 through F9 and Shift.

□

Information on the main window:

- Date and hour in local format and UTC.
- Information on the Radio station and Operator.
- Tuning bar. Click and drag the pointer to change frequency. The bar will become of red color when the RTX is syntonized. Click with the mouse right key for [numerical input](#) of the frequency.

□

Keys:

All the keys are easily identifiable, signal:

[Mini] Hides all windows and activates the interface minimized (see below)

[Sync.] Reset and restart the connection between RTX and program.

[Polling] If active periodically reads the values of the rtx controls, if deactivated controls only SMeter, Frequency and LAN/internet or you are using a slow connection to the rtx is recommended to disable Polling.

[Store] [Memorizes the active values.](#)

[Band Stacking] Saves/Recalls frequency and operating mode from the operating stacks.

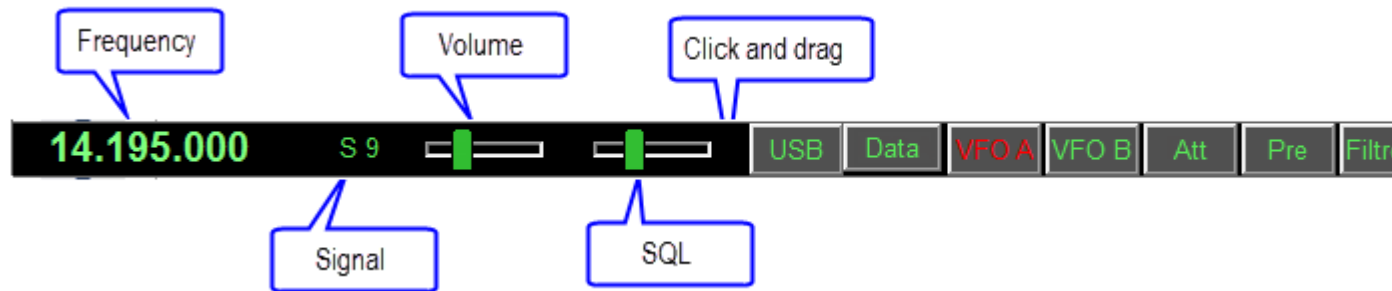

[Rev.] Active only if active DUP or DUP-. Swap frequency transmission with receive.

[Help] Visualizes this guide.

[Exit] Exits from the program.

[Hook Clipboard] Enable/disable the elaboration of the data of the clipboard of Windows.

INTERFACE MINIMIZED:

Activated by the button [Mini] allows to manage all functions of the radio, taking up little space on the screen.

[Full] Restore main window

Memory Import / Export

Memory Import / Export

[Top](#) [Previous](#) [Next](#)

Memory Import / Export

[Top](#) [Previous](#) [Next](#)

Import or Export the bench of memory in a CSV format file. The format CSV can be used with Microsoft Excel.

[Field separator] Character to be used for separating a field from the other.

[Decimal separator] Character to be used for pointing out the decimal value (Es. 87.5 use the point)

[File] Select the file to create or to use

[...] Press for browsing the folders to the search of the file

[Start] Begin the conversion

[Close] Close this window

[Files exported from ARRL TravelPlus] Used to import the memories generated with the ARRL TravelPlus programme

[Use the Sequence number for memory] Use the Sequence field as the number of memory (maximum 99)

[Use memories from the number 1] Import the memories from number 1 of the bench current and ignoring the sequence field

To successfully import the memories, use the function Export Repeater Data of the TravelPlus programme with the settings following :

Select Columns and Max. Width

	Truncate	Max.
<input checked="" type="checkbox"/> Sequence Number	6	6
<input type="checkbox"/> Band	25	25
<input type="checkbox"/> Country	6	6
<input type="checkbox"/> State	24	24
<input type="checkbox"/> Region	30	30
<input type="checkbox"/> Location	29	29
<input checked="" type="checkbox"/> Output Frequency	10	10
<input checked="" type="checkbox"/> Input Frequency	10	10
<input checked="" type="checkbox"/> Call Sign	13	13
<input type="checkbox"/> Repeater Notes	31	31
<input checked="" type="checkbox"/> CTCSS Tones	7	7
<input type="checkbox"/> Sponsor	30	30
<input type="checkbox"/> Distance	8	8
<input type="checkbox"/> Bearing	8	8

Column Sequence

To change the sequence in which columns are exported, highlight the column name and up it up or down in the list:

Sequence Number
Output Frequency
Input Frequency
Call Sign
CTCSS Tones

Format

☒ Comma Delimited File
☐ Tab Delimited File
☐ HTML
☐ XML Spreadsheet

☒ Include Column Headings

Pre-Defined Formats

Note: Data can also be selected from a list by row selection or Edit > Select All Columns. Then use Edit > Copy to copy to clipboard for pasting into other applications such as Excel.

OnAir

Funzioni

[Top](#) [Previous](#) [Next](#)

On Air

[Primo](#) [Precedente](#) [Prossimo](#)

The screenshot shows a software interface for controlling the IC7100BKT radio's CAT (Computer Aided Transceiver) features. It is divided into two main sections: HrdLog and EnzoLog.

HrdLog Section:

- Enable OnAir:** A checkbox that is currently unchecked.
- Callsign:** A text field containing "IZ2BKT".
- Radio:** An empty text field.
- Refresh:** A dropdown menu set to "30" with a unit "s" (seconds).
- Enable Cat:** A checkbox that is currently checked.
- Code:** A text field containing "*****".
- Mode:** An empty text field.
- DX Cluster:** A blue hyperlink.
- Send Now:** A button.

EnzoLog Section:

- Enable:** A checkbox that is currently unchecked.
- Callsign:** A text field containing "IZ2BKT".
- Radio:** An empty text field.
- Refresh:** A dropdown menu set to "35" with a unit "s" (seconds).
- Password:** A text field containing "*****".
- Mode:** An empty text field.
- Send Now:** A button.

Send via internet the On-Air status with frequency and operating mode in HrdLog and EnzoLog
If enabled, it adds some CAT features to HrdLog

[Enable] Enable / disable the automatic sending of the state

[Callsign] Callsign used in HrdLog or EnzoLog

[Code] Only HrdLog, enter the upload code received at registration on HrdLog

[Password] Only EnzoLog, enter the password to access EnzoLog

[Radio] Enter a descriptive text of the transceiver, if blank will be sent the description of the selected radio in configuration

[Mode] Mode, if blank will be sent to the current operating mode

[Refresh] Interval in seconds for sending a new state

[Send Now] Send status immediately

[Enable Cat] Enable the CAT interface to HrdLog, for example clicking on the frequency in the cluster page tunes the rtx (requires Microsoft .NET Framework 4)

[DX Cluster] Opens in the browser HrdLog DX clusters

On-Air operation requires an internet connection

More information about the On-Air are available on HrdLog and EnzoLog

Hook Clipboard

Functions

[Top](#) [Previous](#) [Next](#)

Hook Clipboard

[Top](#) [Previous](#) [Next](#)

To activate the Hook Clipboard means to intercept the data that are copied in the clipboard of Windows through the command Copy or pressing CTRL+C after having selected a text. After having intercepted them, they are analyzed and, if considered valid, that is that they contain an inclusive number in the range of frequency of the Icom 7000, they are used for setting frequency and operational mode in accord with the settaggio of the limits of band and mode.

The principal purpose of this function is I data exchange data with programs DXCluster.

Example of use with the program RxClus:

- 1) Activate the function Hook Clipboard
- 2) Activate RxClus
- 3) When it passes an interesting spot, select the frequency and press the keys Ctrl+C, the RTX will be planned on this frequency.

DX de G1HWY:	28689.8	K7QQ	WA	1551Z
DX de IK7AFM:	28654.8	N4ZZ	TN	1551Z
DX de I28BRI:	28698.8	WA4TII		1604Z

Select the frequency and press CTRL+C

For a correct exchange of data it is necessary to correctly shape the parameters <Communication with the Clipboard> in the [mask of configuration](#), besides to use the mask of [Setting Limits of band and mode](#) to select the mode of transmission corrected in base to the frequency of the spot.

Remote management by TCP/IP

Remote management by TCP/IP

[Top](#) [Previous](#) [Next](#)

The remote management by TCP/IP is managed through two separate moduls:

1. Server [BKTServer](#)
 Running on the computer connected to the RTX.
2. Client [BKTClient](#)

Is necessary opening the communications port (default 7060 TCP) on the firewall.

BKTClient - Setup

Server: PC2

Port Com.: 7060

Local IP: 192.168.070.001 (only if there are more than one LAN card)

Enable Audio Support: ☐

Send audio only when the PTT is ON: ☒

Audio input: Default

Audio output: Default

Password: *****

OK Cancel

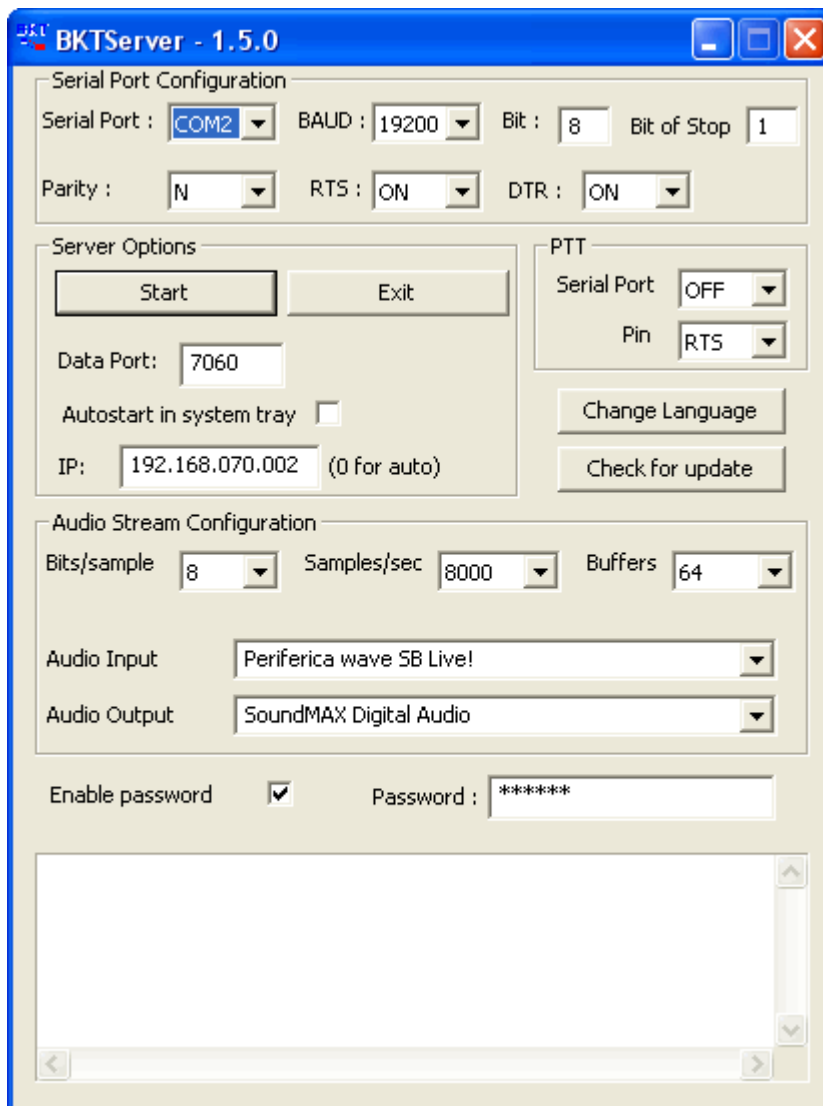

[Server]	IP address of the PC server with in execution BKTServer
[Port Com.]	LAN port of communication
[Local IP]	If you have multiple LAN cards you can specify the local IP address.
[Enable Audio Support]	Enables the receipt/ transmission of the audio. For a correct working the server pc must have the audio card connected to the RTX, the pc client uses the microphone to transmit. Is not possible transmit audio file
[Send audio only when the PTT is ON]	Will transmit the audio from the client toward the server only when the PTT is active, this allows to have a lower band transmission
[Audio input]	Select the audio card which the microphone is connected on and enable the microphone entry from Windows mixer
[Audio output]	Select the audio card where to listen to the audio received from the server, regulate the volume using Windows mixer
[Password]	Password connection, only used if required by the server

BKTServer

BKTServer

[Top](#) [Previous](#) [Next](#)

BKTServer must be in execution on the remote computer attached to the RTX.

[Serial Port Configuration]

Specify the parameters of connection with the RTX.

[Server Options]

Data Port:

Port LAN of listening and communication (default = 7060) (she must be opened by the firewall).

Autostart in system tray: He starts the server automatically and reduces it to icon in the system tray.

IP:

IP address of listening, if 000.000.000.000 BKTServer automatically selects the IP of the first net interface. Attention him IP choosing must be associate to a network interface of the computer where is in execution BKTServer.

[PTT]

Specifies the PTT parameters (see PTT configuration in the help of the program IC706_BKT.)

Not used for the Icom IC-7000 and IC-7100.

Change Language: Program language to use.

Check for update: Check if new version its available. Need a internet connection.

[Audio Stream Configuration]

Specify the parameters audio, increasing the values of Bits/sample and Samples/sec it will increase the fidelity of the audio but it needs greater band. Increase the Buffers if loss audio packets.

Enable password: if set only client with correct Password is available to connect.

Interfacing with other programs

Interfacing with other programs

[Top](#) [Previous](#)

IC7100BKT includes a DDE server compatible with the suite DXLab that allows you to communicate with different programs including [MultiPSK](#), FLDigi with [Fldigi-DXLab Gateway](#) installed, [JT65_HF](#), SpotCollector and other compatible with Commander of DXLab suite.

For a proper functioning of the DDE server requires that the program IC7100BKT is executed BEFORE any other program.

If DDE doesn't work, it's possible to enable the LAN Protocol in the configuration to [use IC7100BKT with JTDX, WSJT-X, JS8CALL, MSHV](#), etc...
